### CONSENT TO ROUTINE PROCEDURES AND TREATMENTS

***Important: Do not sign this form without reading and understanding its contents.***

I hereby apply for and consent to admission and treatment by this medical practice and authorize all routine activities, treatments, examinations and diagnostic services. During the course of my care and treatment, I understand that various types of tests and diagnostic treatment procedures ("Procedures") may be necessary. The Procedures may be performed by physicians, nurses, technicians, physician assistants or other health care professionals ("Healthcare Professionals"). While routinely performed without incident, there may be material risks associated with each of these Procedures. I understand that it is not possible to list every risk for every Procedure and that this form only attempts to identify the most common material risks and alternatives (if any) associated with the Procedures. I also understand that various Healthcare Professionals may have differing opinions as to what constitutes material risks and alternative Procedures.

The Procedures may include, but not limited to the following:

- (1) **Needle Sticks**, such as shots, injections, intravenous lines or intravenous injections (IV's). The material risks associated with these types of Procedures include, but not limited to, nerve damage, infection, infiltration (which is fluid leakage into surrounding tissue), disfiguring scar, loss of limb function, paralysis or partial paralysis or death. Alternatives to Needle Sticks (if available) include oral, rectal, nasal or topical medications (each of which may be less effective) or refusal of treatment.
- (2) **Physical tests, assessments and treatments** such as vital signs, internal body examinations, wound cleansing, wound dressing, range of motion checks, and other similar procedures. The material risks associated with these types of Procedure include, but not limited to, allergic reactions, infection, severe loss of blood, musculoskeletal or internal injuries, nerve damage, loss of limb function, paralysis or partial paralysis, disfiguring scar, worsening of the condition and death. Apart from using modified Procedures and/or refusal of treatment, no practical alternatives exist.
- (3) **Administration of Medications** whether orally, rectally, topically or through the eye, ear or nose. The material risks associated with these types of Procedure include, but not limited to, perforation, puncture, infection, allergic reaction, brain damage or death. Apart from varying the method of administration and/or refusal of treatment, no practical alternatives exist.
- (4) **Drawing Blood, Bodily Fluids or Tissue Samples** such as those done for laboratory testing and analysis. The material risks associated with this type of Procedure include, but not limited to, paralysis or partial paralysis, nerve damage, infection, bleeding and loss of limb function. Apart from long-term observation and/or refusal of treatment, no practical alternatives exist.

(5) **Insertion of Internal Tube** such as bladder catheterizations, nasogastric tubes, rectal tubes, drainage tubes, enemas, etc. The material risks associated with these types of Procedure include, but not limited to, internal injuries, bleeding, infection, allergic reaction, loss of bladder control and/or difficulty urinating after catheter removal. Apart from external collection devices and/or refusal of treatment, no practical alternatives exist.

**I understand that:**

- 1 The practice of medicine is not an exact science and that NO GUARANTEES OR ASSURANCES HAVE BEEN MADE TO ME concerning the outcome and/or result of any Procedures;
- 2 The Healthcare Professionals participating in my care will rely on my documented medical history, as well as other information obtained from me, my family or others who have knowledge of me, in determining whether to perform or recommend the Procedures; therefore, I agree to provide accurate and complete information about my medical history and conditions;
- 3 I may withdraw my consent for any test or procedure at any time.

**By signing this form:**

- 1 I consent to Healthcare Professionals performing Procedures as they may deem reasonably necessary or desirable in the exercise of their professional judgment, including those Procedures that may be unforeseen or not known to be needed at the time this consent is obtained;
- 2 I acknowledge that I have been informed in general terms of the nature and purpose of the Procedures, the material risks of the Procedures and practical alternatives to the Procedures;
- 3 I consent to the observation and participation of personnel-in-training and students in my care and treatment;
- 4 I consent to the disposal by staff personnel of any specimens, tissue or parts that may be removed from my body during my care;
- 5 If I have questions or concerns regarding these Procedures, I will ask my physician to provide me with additional information. I also understand that my physician may ask me to sign additional Informed Consent documents.
