Suiza C. Chua, MD., FACOG

POLICY ON NARCOTIC DRUG PRESCRIPTIONS

It is the policy of the providers to NOT prescribe narcotic medications at the request of patients on the weekends or after hours. The providers must have access to the medical record to make such decisions.

I understand that narcotic medications will not be available unless the patient is evaluated and a determination is made by a physician.

I also understand that narcotics are addictive. A fact sheet has been provided to me regarding opioid use, which includes risks and side effects of opioid use, proper and safe disposal of unused prescriptions and options for non-narcotic pain relief.
